❺ الرياضيات العامة لغات ـ للصف الثانى الثانوي ـ الشعبة الأدبية ـ الأداء الصفى ـ الأسبوع الخامس ❺

1- Use the curve of the function f where $f(x) = x^2$ to represent the functions:

a) $g(x) = x^2 + 2$ b) $h(x) = (x + 2)^2$

2- Use the curve of the function f where $f(x) = x^3$ to represent the functions:

a) $g(x) = x^3 - 3$ b) $h(x) = 1 - (x + 2)^3$

3- Graph the curve of the function f where $f(x) = (x - 1)^3 + 2$, from the graph deduce the range of the function and invistegate its monotony from the graph.

4- Use the curve of the function f where $f(x) = |x|$ to represent the functions:

a) $g(x) = |x + 1|$ b) $h(x) = 2 - |x|$

5- Use the curve of the function f where $f(x) = \frac{1}{x}$ to represent the functions:

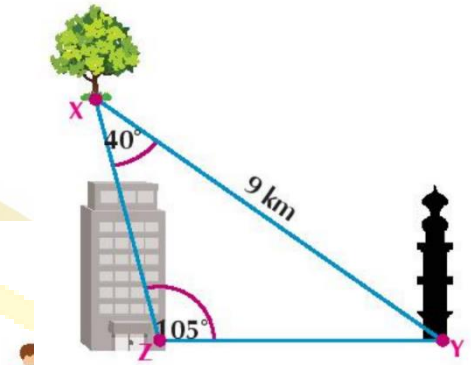

a) $g(x) = \frac{1}{x} + 1$ b) $h(x) = 2 - \frac{1}{x+3}$

6- Find: $\lim\limits_{x \to 3} \frac{x^2-9}{x-3}$

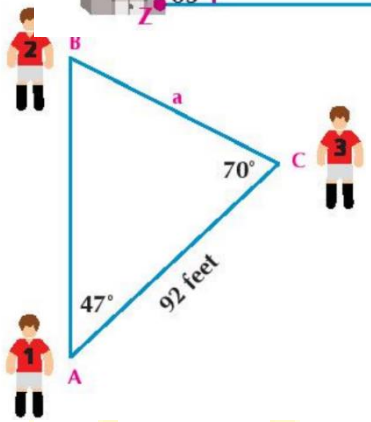

7- Find: $\lim\limits_{x \to -3} \frac{x^3+27}{x+3}$

8- Find: $\lim\limits_{x \to 3} \frac{x^3-8}{x^2-x-2}$

9- In the opposite figure there are three geographical positions forming a triangle. If the distance between position X and position Y is 9 Km and measure of the angle at position X is 40° and measure of the angle at position Z is 105°, then find the distance between position X and position Z to the nearest km.

10- The opposite figure represents three players from a football team during a match. Find the distance between the second player (at point B) and the third player (at point C).

❺ الرياضيات العامة لغات ـ للصف الثانى الثانوي ـ الشعبة الأدبية ـ الأداء المنزلى ـ الأسبوع الخامس ❺

1- Use the curve of the function f where $f(x) = x^2$ to represent the functions:

a) $g(x) = 1 - x^2$ b) $h(x) = (x-1)^2$

2- Use the curve of the function f where $f(x) = x^3$ to represent the functions:

a) $g(x) = x^3 + 1$ b) $h(x) = (x-2)^3 + 1$

3- Graph the curve of the function f where $f(x) = 3 - (x+1)^3$, from the graph deduce the range of the function and invistegate its monotony from the graph.

4- Use the curve of the function f where $f(x) = |x|$ to represent the functions:

a) $g(x) = |x-2|$ b) $h(x) = 2 - |x|$

5- Use the curve of the function f where $f(x) = \frac{1}{x}$ to represent the functions:

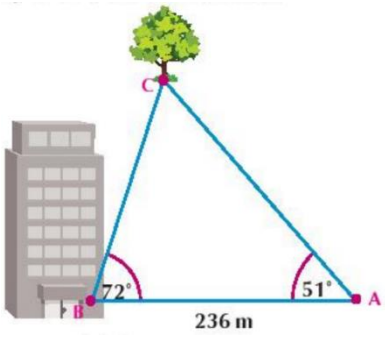

a) $g(x) = \frac{1}{x} - 2$ b) $h(x) = \frac{1}{x+1} + 2$

6- Find: $\lim\limits_{x \to 2} \frac{x^2-4}{x-2}$

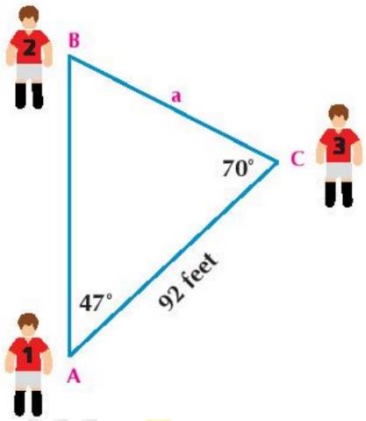

7- Find: $\lim\limits_{x \to -2} \frac{x^3+8}{x+2}$

8- Find: $\lim\limits_{x \to -3} \frac{x^2-9}{x^2-2x-15}$

9-In the opposite figure there are three geographical positions forming a triangle.
If the distance between position A and position B is 236 meters and measure of the angle at position B is 72° and measure of the angle at position A is 51°, then find the distance between position C and position B to the nearest km.

10- The opposite figure represents three players from a football team during a match. Find the distance between the first player (at point A) and the second player (at point B).

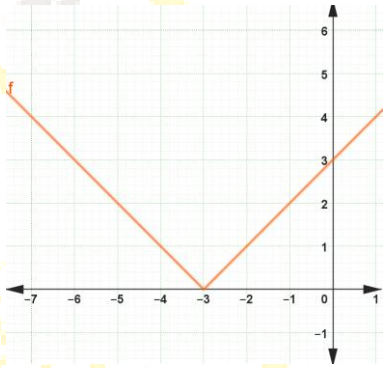

First Group

1- Graph the curve of the function f where $(x) = (x-1)^2$, from the graph deduce the range of the function.

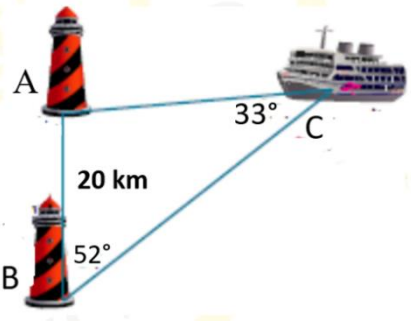

2- Graph the curve of the function f where $(x) = x^3 + 2$, invistegate its monotony from the graph.

3- Write the rule of the function f represented graphically by the following graph:

4- Find $\lim_{x \to 1} \frac{x^2-1}{x-1}$

5- The opposite figure represents two light houses A and B, the distance between them is 20 km lie on one line from the Nourth to the South, A ship at position C such that m (∠ ACB) = 33° , m (∠ ABC) = 52°.
Find the distance between the ship and the light house A to the nearest km

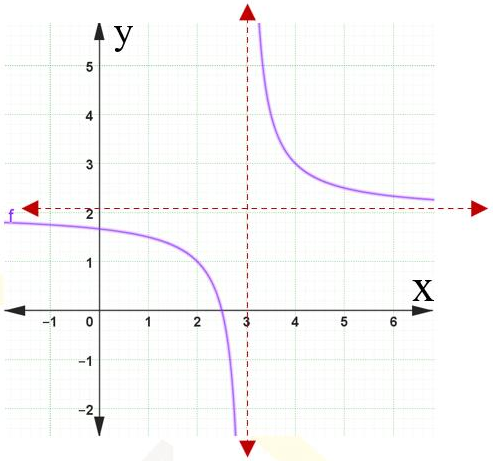

Second Group

1) Graph the curve of the function f where $f(x) = (x+3)^2$, from the graph deduce the range of the function.

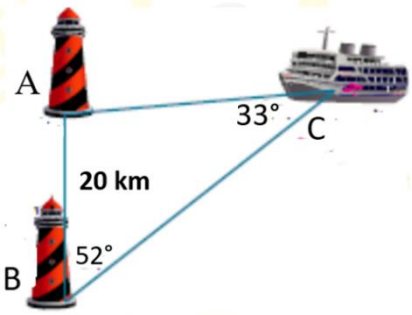

2) Graph the curve of the function f where $f(x) = x^3 - 1$, invistegate its monotony from the graph.

3) Write the rule of the function f represented graphically by the following graph:

4) Find $\lim_{x \to 5} \frac{x^2-25}{x-5}$

5) The opposite figure represents two light houses A and B, the distance between them is 20 km lie on one line from the Nourth to the South, A ship at position C such that m (∠ ACB) = 33° , m (∠ ABC) = 52°. Find the distance between the ship and the light house B to the nearest km

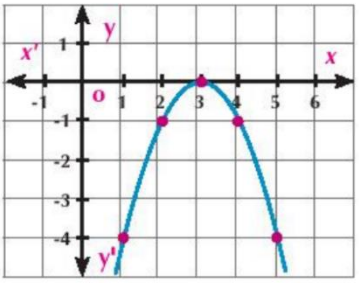

Third Group

1) Graph the curve of the function f where $f(x) = (x-2)^3$, from the graph deduce the range of the function.

2) Graph the curve of the function f where $f(x) = x^2 + 1$, invistegate its monotony from the graph.

3) Write the rule of the function f represented graphically by the following graph.

4) Find $\lim_{x \to 4} \frac{x^2-16}{x-4}$

5) The opposite figure represents the position of three Egyption cities forming a triangle, if the distance between Cairo and Suez is 134 km. measure of the angle at Suez is 30° and measure of the angle at Fayoum is 40°
Find the distance between Cairo and Suez to the nearest km
