

برعاية معالي وزير التربية والتعليم

السيد الأستاذ / محمد عبد اللطيف

وتوجيهات مساعد الوزير لشئون تطوير المناهج التعليمية
والمشرف على الإدارة المركزية لتطوير المناهج

د/ اكرم حسن

اداءات وتقييمات

الصف الثاني الاعدادى-Science

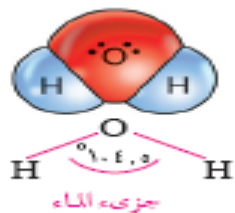

لجنة الاعداد والمراجعة

خبراء مكتب تنمية مادة العلوم

اشراف علمى

مستشار العلوم

د/ عزيزه رجب خليفة

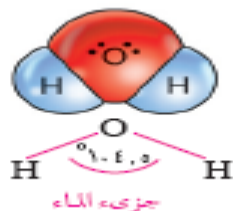

THE WEEKLY PERFORMANCES FOR THE THIRD AND FOURTH WEEK

PREP 2

SECOND LESSON

Choose the right answer:

- 1- Molecule is a polar compound.
(ammonium – hydrogen sulphate – methane – sodium chloride)
- 2- All the following elements don't react instantly with water EXCEPT
(SODIUM – SILVER – CALSIUM – ZINC)
- 3- All the periods in the periodic table starts withelement .
(metal – non-metal - semi metal - inert gas)
- 4- if the atomic volume of an element lies in the second group is 60 picometer ,
so the atomic volume of an element lies in the same period in the sixth group
ispicometer
(70 - 80 - 50 - 90)
- 5- if the atomic volume of an element lies in the second group is 60 picometer ,
so the atomic volume of an element lies in the same group is
.....picometer
(70 - 80 - 50 - 90)
- 6- The semi – metals belong to class
(s - p - d - f)
- 7- All the following metals are semi -metals EXCEPT
(Si - B - O - F)

8- The element has the largest atomic volume .

(Cs - K - Li - Na)

9- All the following elements don't react with hydrochloric acid EXCEPT (

N - S - C- Mg)

10- A metal doesn't react with water

(K , Na - Ca , Mg - Zn , Fe - Cu ,Ag)

11- During the chemical reaction between Sodium and water ,.....gas evolves.

(H₂ - O₂ - N₂ - CO₂)

12- Bromine 's valency is (1 - 2 - 3 - 4)

13- is found in nature in solid state .

(Florine - Bromine - Iodine - Chlorine)

14- is a liquid nonmetal which is used in preserve cornea eye.

(N₂ - Na - Si - Co)

15- is a semi metal which is used in manufacturing computer

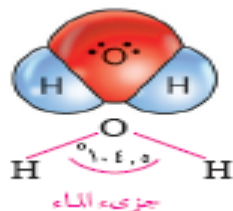

(N₂ - Na - Si - Co)

16- A liquid metal which is used in transfer heat from inside the nuclear reactor to outside .

(N₂ - Na - Si - Co)

17- An element which keeps under kerosine surface.

(K - Na - F - Ca)

18- Alkali elements float on water surface and

(rubidium and cesium - rubidium and sodium - cesium and lithium - sodium and lithium)

19- Alkali elements sink in water and

(rubidium and cesium - rubidium and sodium - cesium and lithium - sodium and lithium)

20- Neon molecule consists of While chromium one is consists of.....)

(one atom / two atoms - two atoms / three atoms - three atom / two atoms - two atoms / one atom)

21- The largest group in atomic volume is

(1A - 2A - 0 - 7A)

22- The strongest nonmetals lie in the

(first group - group 17 - zero group - second group)
