د/ عزيزه رجب خليفة

إدارة تنمية مادة العلوم

2024 - 2025

Subject: Science

Grade: 6

Unit: 3(Water, Weather and climate)

First Concept: energy transfer through water cycle

**CLASS PERFORMANCE
2nd WEEK**

Question one : Complete the following :

- 1- The moist air contains a large amount of
- 2- When a gas or a liquid is heated, its density will
- 3- The air rises up.
- 4- The weather of the regions near equator is more
- 5- The is considered the main drive the cycling of wind around Earth.

Second question : put (v) or (X)

- 1- The cold air is replaced the cold air. ()
- 2- Transpiration from plant leaves decreases in the morning. ()
- 3- In condensation process, water vapor gains energy. ()
- 4- Water cycle is the movement of water between different reservoirs ()

Third question :

How does the amount of solar energy effects the transpiration rate of plant leaves?

2024 - 2025
