## HOMEWORK 2<sup>nd</sup> WEEK

**Subject: Science** 

**Grade: 6** 

**Unit:** 3(Water, Weather and climate)

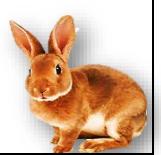

First Concept: energy transfer through water cycle

## 1- Choose the right answer:

- a) The three main steps make up water cycle are ...........
  - 1. Evaporation condensation runoff
  - 2. Melting condensation evaporation
  - 3. Melting runoff condensation
  - 4. Precipitation runoff evaporation
- b) Evaporation refers to the transformation from ........... state
  - to ..... state
    - 1. a liquid \_\_\_ a solid
    - 2. a solid \_\_\_ a liquid
    - 3. a liquid \_\_\_ a gas
    - 4. a solid \_\_ a gas
- c) Transpiration represents ...... of water vapor in the air.
  - 1.5%
  - 2. 10%
  - 3. 20%
  - 4. 40%

2024 - 2025

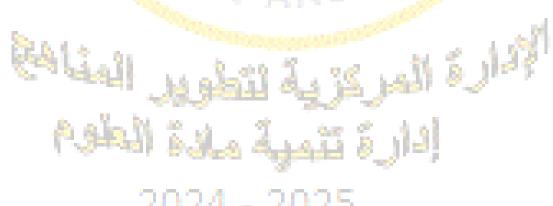

- d) The ...... forms when many tiny water droplets together.
  - 1. Rain
  - 2. Cloud
  - 3. Water vapor
  - 4. Fog

## 2- Put ( $\sqrt{}$ ) or (X):

- a) Evaporation occurs as a result of gaining heat energy (
- b) Small lakes dry as a result of the runoff
- c) Condensation occurs when a gas is heated and turning to a liquid
- d) Convection currents in atmosphere help in determining regional climates. )

## 3- Third question:

What is the relation between the convection and the condensation?

2024 - 2025
