WEEKLY EVALUATION  
2<sup>nd</sup> WEEK

**Subject: Science**

**Grade: 6**

**Unit: 3(Water, Weather and climate)**

**First Concept: energy transfer through water cycle**

**GROUP (A)**

**1- Choose the correct answer:**

The water changes from liquid to gas by ..... process.

( melting - condensation - evaporation – freezing )

**2- Complete** : The water moves on Earth among .....

**3- Mention the scientific name** :

A process that plants get rid of excess water in water vapour form through spores.

.....

**4- Explain the scientific reason:** Deserts get very little rain.

.....

**5- What happens when :**

The surface water exposes to high temperature from the sun.

.....

**GROUP (B)**

**1- Put ( √ ) or ( X )**

Condensation process is turning hot water into water vapour ( )

**2- Complete:** The .....air goes down.

**3- Mention the scientific name** : The process that occurs when the water droplets which forming clouds become heavier and fall down by gravity .

.....

**4- Mention the scientific reason** : The occurrence of evaporation process.

.....

**5- What happens when :** Water runs off the land .

.....

## GROUP (C)

**1- Complete:**

The tiny water droplets have condensed out of the air forming .....

**2- Mention the scientific name :**

A liquid turns into a gas by gaining energy

.....

**3- Mention the scientific reason :**

The temperature differs around the world .

.....

**4- What happens when : Water runs off the land .**

.....

**5- Explain : the importance of convection currents**
