Class Performance

Thirteenth week

Choose the correct statement from the following:

- 1- Each of the following nerves has two roots (dorsal and ventral) except
a- cervical. b- lumbar. c- sacral. d- cranial.
- 2- The autonomic nerve fibres that cause constriction of the eye pupil arise from region.
a- sacral b- thoracic c- cervical d- brainstem
- 3- The region of marrow which the fibres of autonomic nervous system do not exit from it is the region.
a- cervical b- thoracic c- lumbar d- sacral

Write what the following terms indicate:

- 1- A system that acts as an emergency system, as the nerve impulses carried by this system control many of the body's internal organs.
- 2- A nervous system whose fibers originate from the brainstem and the sacral region of the spinal cord.
- 3- A system that regulates various activities beyond human control, such as the secretion of the body's glands.

Give reason for the following:

- The leg moves when struck below the knee with a medical mallet.

What happens when:

- Saliva is secreted when frightened.

Correct the following statements:

- 1- The nerve fibers that increase heart contraction originate in the lumbar region of the spinal cord.
- 2- During relaxation, the sympathetic nervous system is activated.
