3) Read the following passage, then answer the questions:

There are many plants that can eat small animals. One famous meat-eating plant is the Venus flytrap. It grows in dry parts of the United States. Its leaves are like the pages of a book. They can open and close very quickly. Inside the leaves, there are three small hairs. If a fly touches one of the hairs, the leaf closes quickly. The fly cannot get out. In about half an hour, the leaf presses the fly until it is dead. Then, the plant covers the fly. Slowly, the plant eats the fly. Most plants get what they need from the sun. In some places, the ground doesn’t have nitrogen. Insect meat has a lot of nitrogen, so some plants eat meat to get what they need.
